

THE CONSERVATION OF
UNIQUE & RARE PLANTS

RARELIFEPLANTS.COM

THE MISSION

Rare Life Plants™ is a newly created brand of exceptional plant varieties, brought together by a partnership with Juniper Level Botanic Garden and Must Have Perennials®. With a long-term goal of supporting the JLBG Foundation and its mission, Rare Life Plants™ will use royalties collected to help support this endeavor and further partnerships with North Carolina State University.

Juniper Level Botanic Garden's mission is to promote botanical diversity by curating the most extensive collection of growable, winter and summer hardy ornamental plants suitable for our region. As such, Rare Life Plants™ will continue to support that mission as both organizations enter a new chapter.

With a rich legacy formerly known as Blooms of Bressingham, Must Have Perennials® has cultivated a reputation for delivering top-tier perennial selections for over a quarter-century. This partnership will provide exceptional varieties to the worldwide marketplace with continued introductions for years to come.

AGAVE

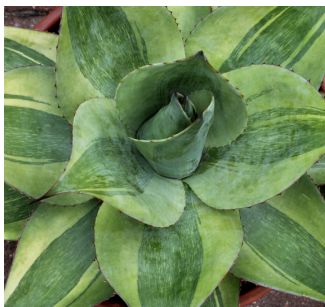

AGAVE
x nickelima

'GREAT WHITE SHARK'

Height: 18"

Hardiness Zone: 9b - 11

Exposure: Sun to Part Sun

Juniper Level Botanic Garden's mission is to promote botanical diversity by curating the most extensive collection of growable, winter and summer hardy ornamental plants suitable for our region. These plants are showcased in a visually appealing, sustainably maintained, and vibrant garden environment.

The garden's philosophy involves acquiring plants from around the globe, with a particular focus on North American native species, recognizing their equal adaptability compared to plants from other regions. The plants are sourced through exploration, breeding, and collaborations with other botanic gardens and horticultural specialists.
